

## Rug Seal

### Are your cotton canvas rugs looking tired and jaded?

Equinade has an easy and economic solution to add new life to your rugs and canvas goods.

Equinade Rug Seal is a re-proofing formula to help waterproof cotton canvas. It can be applied easily with a brush or by spraying and has no fumes.

To begin, thoroughly wash the rug to remove all dirt and allow to dry. Apply **Equinade Rug Seal** to the outside surface, paying attention to seams and stitched areas. Apply two coats, allowing time to dry between each application. The underside of the canvas can also be treated.

The canvas should be in good condition, clean, dry and have at least 30% cotton content. **Rug Seal** re-proofs and will also resist dry rot and mildew. Suitable for all cotton canvas products. One litre covers approximately six square metres.

Available in 1 litre and 2.5 litre bottles from your local equestrian or produce store along with the complete range of Equinade products.
